

IRRIGATION SERVICE

APPLICABILITY:

Applicable to Consumers of the Cooperative for pump irrigation service exclusive of center pivot drives and reuse pumps which will be served under IS-CP, subject to established rules of the Cooperative.

TYPE OF SERVICE:

Single-phase or three-phase, sixty (60) cycles, at available voltages. Single phase service may be furnished at the discretion of the cooperative where three phase service is not available.

RATE:

The rate for irrigation service shall be:

Annual Horsepower:	\$25.00 per hp per year
Energy Charge:	\$0.0735 per kWh

MINIMUM CHARGE:

The minimum annual charge under the above rate shall be the higher of the following:

1. Twenty-five dollars (\$25.00) per horsepower except that, for motors of less than ten horsepower, it shall be two hundred and fifty dollars (\$250.00). No kWh energy shall be allowed for the horsepower charge.
2. As per contract under the Line Extension Policy.

DETERMINATION OF HORSEPOWER:

The horsepower for billing purposes shall be determined, as necessary, by a demand meter or other test each irrigation season and shall be the horsepower input to the motor. However, the billing horsepower shall not be less than any billing horsepower established during the preceding eleven (11) months.

If the consumer changes or modifies their irrigation system in such a manner as to permanently reduce the metered billing horsepower by ten (10) percent or greater, an adjustment to the billing horsepower will be made to reflect the modified billing horsepower. If the changes or modifications occur prior to July 1, the billing horsepower adjustment will be made in that year. Changes or modifications made after July 1 will result in no change to billing horsepower, however, adjustment will be made to billing horsepower in the following year.

If actual installed or metered horsepower is less than 10 horsepower, the horsepower used for billing purposes shall be 10 horsepower.

LOAD MANAGEMENT CREDIT:

If the Consumer contracts with the Cooperative under its Load Management Program whereby the Cooperative has the option of interrupting service to the Consumer when the Cooperative is approaching peak conditions, an annual credit of \$15.00 per horsepower will be provided. The Cooperative has the right to interrupt service at any time and for any duration, although every effort will be made to keep control periods as short as possible.

POWER FACTOR:

Consumer agrees to maintain unity power factor as nearly as practicable. The horsepower for billing purposes may be adjusted to correct for average power factors lower than ninety-five percent (95%) if and when Cooperative deems it necessary. Such adjustments will be made by increasing the horsepower one percent (1%) for each one percent (1%) by which the average power factor is less than ninety-five percent (95%) lagging.

TERMS OF PAYMENT:

The annual minimum charge will be billed in March of each year. In cases where connections have not been made by that date, the minimum will be due upon connection. Monthly energy charges shall be billed each month during the irrigation season. Terms of monthly payment shall be in accordance with the Rules and Regulations of the Cooperative as they currently exist or may be amended from time to time.
