## Hagans & Speer to Attend Washington, D.C., Youth Tour

**KATE HAGANS** and **HANNA SPEER** will be touring the nation's capitol with 32 other students from across Kansas for the 51st Annual "Government in Action" Youth Tour, June 9-15.

Hagans and Speer were selected from a group of high school applicants by Lane-Scott. To win this trip, students were asked to write an essay that answered the question: "How have the services from Lane-Scott Electric Cooperative make our lives better?"

"Lane-Scott is proud to support the Youth Tour program and send our youth to experience government in action," said Earl Steffens, Manager. "Our hope is that local students will gain some awareness of how our political system works and how important it is for the youth to be involved in our community."

Kansas is one of the 45 states to send a youth delegation to the annual electric cooperative youth tour. Since 1964, the nation's electric cooperatives have collectively organized the trips for more than 40,000 high school juniors and seniors to visit U.S. congressional members, energy and grassroots

government education sessions and sightseeing in Washington, D.C.

The students will begin their trip by touring the state capitol in Topeka, followed by visits to the Wolf Creek Nuclear Power Plant and Lyon-Coffey Electric Cooperative before flying to Washington, D.C. The group will learn about the U.S. government through visits with their senators and congressional delegation, meetings with youth from other states and tours of museums, Capitol Hill, Arlington National Cemetery and the White House.

"We are pleased to continue this tradition of taking Kansas youth to learn about electric cooperatives and our nation's government," said Shana Read, Kansas Electric Cooperative youth director.

Lane-Scott sponsors two students to Washington, D.C., each year. For more information, contact Bob Venters at 620-397-5327.

## Western Kansas ElectroRally Race Results

Ryan Kuhlman drove the 27H car to an eighth place finish in Scott City.

Western Kansas is raced into the ElectroRally season with two races in Scott City and Beloit.

ElectroRally is an event where high school teams design, build, and race electric vehicles. It's not all about speed or endurance. Students must prepare a written report, documenting the car's design, tests, publicity, any problems faced, and the funding process.

Teams have to decide between using speed or conservation of the battery to earn the most laps. The car finishing the most laps in one hour wins.

To make the race consistent for all racers, drivers must weigh at least 180 pounds, or include enough ballast to bring the weight up to 180 pounds. The batteries cannot weigh more than 67 pounds.

The cars are built and designed by the students. They design the chassis (body of the car), wheels and other parts of the car. Parts from other ElectroRally cars can be salvaged to use on the newest-built car.

ElectroRally offers four classes: novice, standard, experimental, and open. The experimental class allows teams to have an additional power source. Each class comes with guidelines and safety rules that apply to teams, cars and drivers.

Lane-Scott Electric is proud to be a sponsor for Kansas ElectroRally at this event. Other sponsors were: City of Scott City, Pioneer Electric Cooperative, Prairie Land Electric Cooperative, Scott County, Sunflower Electric Power Corporation, Victory Electric Cooperative Western Cooperative Electric and Wheatland Electric Cooperative.,.

See race results at [www.kansaselectrorally.com](http://www.kansaselectrorally.com).

Taylor Parker, Scott City team, drove the 40 car to a 14th place finish at Scott City. In the same car, Garrett Parker finished 16th at Beloit.

Taylor Parker also drove the 83H car to a 13th place finish at Scott City. In the same car, Guy Fullmer drove to a ninth place finish at Beloit.

The Dighton Racing Teams crew prepare to go race at Scott City on April 6.

Dirk Torson drove the 140 car to a ninth place finish at Scott City. In the same car, Seth Shapland finished in eighth place at Beloit.
